

Cutting Edge Theory into Best Practice

Today's innovative ideas are tomorrow's best practices. SCI provides training that translates theory into practice and integrates best practices from around the world into knowledge that modern professionals can use. Explore sci.uoregon.edu/training to learn more about training opportunities.

National and International Workshops

- Site Design for Livable Multifamily Housing
- Street Livability + Sustainable Design
- Community GIS Walkability Assessments
- Triple Bottom Line Sustainability Analysis
- Community Engagement for Underrepresented Communities

Transforming academic research into action.

Conferences & Workshops

SCI hosts and attends conferences and workshops around the country on urban design, transportation planning, and integrating practice into education through SCYP, a model for service-learning at an unprecedented scale.

Catalytic Learning Education Model

The annual SCYP conference is an opportunity for representatives from universities and cities to learn and collaborate. Targeted at a variety of expertise and experiences, attendees include diverse institutional types and community contexts. The conference provides a platform for a national network of sustainable city year programs to learn from each other, working together to help all of the implementing programs get better.

Presentations Domestic and Abroad

SCI directors, faculty and staff also conduct trainings abroad. As of 2014, we've presented on sustainable planning, design, and education in Sweden, Spain, France, England, Gabon, China, Canada and the United Arab Emirates.
