

Sustainable Cities Initiative Presents...

Jettision the Jetsons:

# The Future of Cities & The Self Driving Car

## JEFF TUMLIN

Director of Strategy  
Nelson\Nygaard  
San Francisco, CA

Jeff Tumlin is a well known, action-oriented planner and is currently the Director of Strategy at Nelson\Nygaard where he works on station area, downtown, citywide, and campus scaled sustainable urban design projects. He is also currently leading the transition of Oakland's Department of Transportation toward a comprehensive and inclusive mobility system, including understanding the impacts autonomous vehicles will have on transportation systems in cities.

## ABOUT

The Sustainable Cities Initiative (SCI) is excited to welcome our 2017 Expert In Residence (EIR), Jeff Tumlin. In this public lecture, Jeff will discuss the anticipated possible effects of autonomous vehicles on the form, function, and movement within our cities. Jeff will explore why and how autonomous vehicles should be regulated so that sustainable, equitable, pedestrian and transit friendly urbanism is prioritized and supported. Is this a path to human health and happiness for generations to come? Come listen and engage!

SCI is an applied think tank focusing on sustainability and cities at the University of Oregon. The EIR is part of SCI's Urbanism Next Research Initiative, which focuses on how autonomous vehicles, e-commerce, and the sharing economy affects city form, design, and development.
