

Sustainable City Year Program

Winter 2018

Workforce Asset Analysis and Potential

Professors:

Doug Wilson

City Staff:

Ryan Culp

Discipline:

Honors Business

Students will analyze La Pine area workforce and potential workforce to help the city determine the greatest area of need for its workforce development efforts. They will highlight La Pine's assets and recommend strategies to increase business interest in La Pine's Industrial Park.

Winter 2018

Industry Ecosystem Targeting

Professors:

Doug Wilson

City Staff:

Ryan Culp

Discipline:

Honors Business

Students will research targeted industrial sectors to assess viable business development options for regional and local growth and recommend industries that La Pine may want to focus on.

Winter 2018

Urban Renewal Program Best Practices

Professors:

Doug Wilson

City Staff:

Ryan Culp

Discipline:

Honors Business

Students will research urban renewal program best practices in similar areas around the country to provide La Pine with management recommendations for its own urban renewal efforts.

Sustainable City Year Program

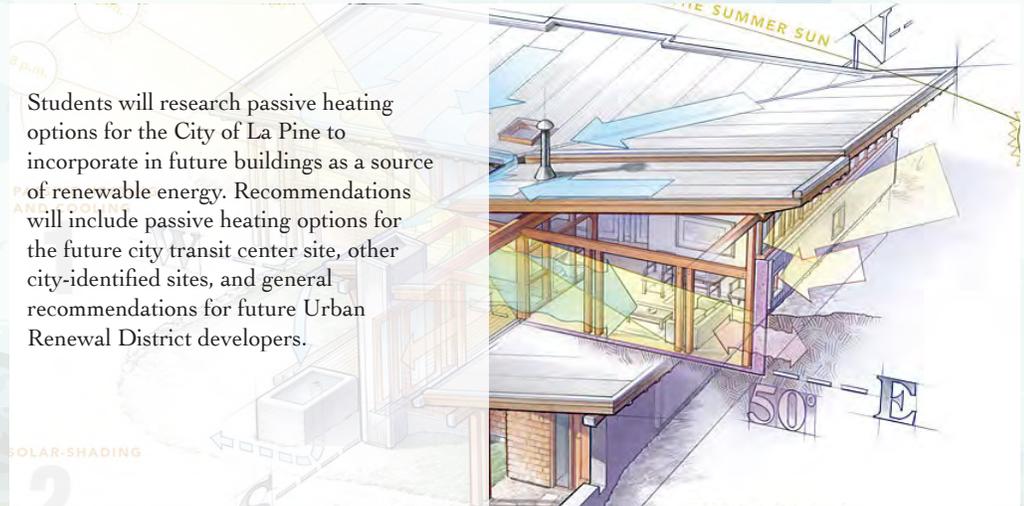

Winter 2018

Passive Heating

Professors:
Alexandra Rempel

City Staff:
Cory Misley

Discipline:
Architecture,
Environmental Studies

Students will research passive heating options for the City of La Pine to incorporate in future buildings as a source of renewable energy. Recommendations will include passive heating options for the future city transit center site, other city-identified sites, and general recommendations for future Urban Renewal District developers.

Winter/Spring 2018

Allen Hall Studios

Professors:
Maya Lazaro, Ed Madison

City Staff:
Cory Misley

Discipline:
Journalism

Students will create video and media products that convey the spirit of the City of La Pine's partnership with the Sustainable City Year Program, as well as share stories of the La Pine community.

Winter/Spring 2018

Wickiup Junction Community Advisory Council

Professors:
Andrew DeVigal

City Staff:
Cory Misley

Discipline:
Journalism

Students will design an engagement plan to form a community advisory council. Students will meet with community members, visit sites of interest, and facilitate community conversations to identify gaps in the local information ecosystem.

Sustainable City Year Program

Spring 2018

Multi-Use and Pedestrian Connectivity Plan

Professors:
Marc Schlossberg

City Staff:
Cory Misley

Discipline:
Planning, Public Policy,
and Management

Students will explore the possibility of creating new multi-use paths encompassing the city, and provide a series of recommendations for developing bicycle and pedestrian transportation opportunities that are safe, connected, and comfortable for all types of users in La Pine.

Spring 2018

Nonprofit Optimization

Professors:
Dyana Mason

City Staff:
Cory Misley

Discipline:
Planning, Public Policy,
and Management

Using a combination of interviews and best practices research, students will assess nonprofit organizations in the City of La Pine. Projects will include a Senior Center Strategic Plan, guidelines to support the district's Parks & Recreation Foundation, and general recommendations for how the city can best support nonprofit organizations operating in La Pine.

Spring 2018

Downtown Revitalization

Professors:
Rob Ribe

City Staff:
Cory Misley

Discipline:
Landscape Architecture

Students will research and recommend design alternatives that improve the aesthetic continuity and overall appearance of La Pine's downtown. The desired outcome of this project will be to catalyze efforts to revitalize the downtown core and encourage development and redevelopment with "main street" design elements and pedestrian-friendly, multi-modal streetscapes
