SCYP Report Writing Timeline – Winter 2022

The report writing process starts immediately after the term ends for your SCYP course. It is easier to start gathering information from your peers and professor(s) before your class ends; for example, you may want to download shared files from Canvas, collect student names and majors, or collect final products (such as InDesign Files, presentations, or reports) from individual students or student groups.

**SCI can be flexible regarding due dates if you communicate early.** If you experience trouble during any part of this process, do not hesitate to reach out to the SCI Report Editor.
