

# Santa Clara Transit Station Fact Sheet

- Since 1982, Lane Transit District (LTD) has operated a transit station located at River Road and River Avenue.
- Several challenges require LTD to relocate the River Road Transit Station, including:
  - Schedule adherence: Buses have difficulties entering and exiting the station due to congestion.
  - Interchange improvements: The Oregon Department of Transportation ( ) has plans for an on-ramp widening project from River Road onto Randy Pape Beltline Highway that will impact the current River Road Transit Station.
  - Insufficient infrastructure: The new station will provide a safe, functional, and positive experience for passengers and neighborhood. The existing River Road Transit Station infrastructure reflects a community's needs from nearly forty years ago.
- LTD acquired the approximately 8-acre property located on River Road between Hunsaker Lane and Green Lane in 2015 for \$3.3 million.
- LTD will develop part of the property into the new Santa Clara Transit Station. The remaining property will be sold or developed at a later date. There are no plans for the remaining property to be used for a homeless camp or for car camping.
- The Santa Clara Transit Station site was the original location of the Santa Clara Grange and then later, Santa Clara Elementary School.
- LTD's current Santa Clara property is part of the refinement plan for the River Road-Santa Clara area and a key area in the City's Envision Eugene process.
- LTD plans to break ground on the new transit station early 2020, with the station becoming operational in 2021.
